

THE NEW PX 5 | ON-EAR & NOISE CANCELLING

# THE PUREST LISTEN

Experience world class sound with the latest Adaptive Active Noise Cancellation technology. Dip into sound with sleek, on-ear headphones that keep out the world so you can live fully in yours.

Bowers & Wilkins

# PX 5

WIRELESS ON-EAR HEADPHONES WITH ACTIVE NOISE CANCELLATION

## A modern sound

---

The PX 5 is light and compact while delivering sound quality built on Bowers & Wilkins' exacting standards. Custom designed 35mm drivers designed and tuned by the same team behind our 800 Diamond Series speakers used in Abbey Road give you music in all its glory.

## Farewell to noise

---

From a library to Grand Central Station, Adaptive Active Noise cancelling automatically adjusts to keep impurities out of the sound.

## Play 25 hours at a time

---

One battery charge and just over a full day of music. If for some reason you need more power, a 15 minute quick charge provides three hours of audio playback.

## Follows your lead

---

The PX 5 obeys your every move. Lift an ear cup to hear what's happening around you and the music automatically stops. Put it back and the music plays on.

## Inspired by race cars

---

The woven carbon fiber composite arms of the PX 5 mimics the strength and agility of the fastest vehicles in the world, channeling pure sound to you and holding up against every-day wear and tear. These headphones rest easy in your work or overnight bag so you can dive into sound anywhere.
