## Virtual Surround Technology

Be immersed with virtual surround sound technology.

With the unit placed under your screen, a virtual sound field is created to reproduce left, center, right and back sound effects, so you can enjoy a fuller rich presence just like a movie theater.

## Clear Voice

Have you ever found it difficult to hear voices or lines from announcements and song vocals? With Yamaha's clear voice function, you can automatically distinguish human voices such as dialogue and narration from other sounds, increasing the volume of only human voices. Even in movies, dramas, news programs, and music where Back Ground Music and sound effects have been used abundantly, the human voice is clearer and easier to enjoy.

## Game Sound Mode

Yamaha's GAME Sound Mode further emphasizes the localization of specific individual audible effects, enhancing the player environment for an immersive gaming experience. Connection to PC's at low volume can still achieve significant surround sound action.

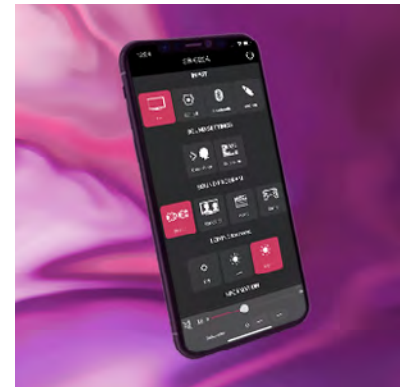

## Rich Bass Reproduction (Built-in SW, Passive Radiator x2, Bass Extension)

This compact sound bar incorporates a built-in 75mm (3") subwoofer unit and dual passive radiator. In addition, the "Bass Extension" enhances any bass signal to ensure a rich and powerful sound.

## Sound Bar Remote App

With the newly developed Sound Bar Remote App its even easier to control your entertainment. The App can switch contents, sound modes, clear voice and bass extension functions and simple power on / off commands intuitively and easily from your smartphone / tablet.

## Compact Size for Desktop Use

With a width of only 60 cm this compact sound bar can be easily positioned in any situation, whether with a monitor of a desktop PC as well as in front of a flat-screen TV, the modest design allows for great flexibility.

(W600mm x H64mm x D94mm).
