

## 'Prima' Stereo Pre-Amplifier

The 'Prima' pre-amplifier, meets all the expectations of the ultimate levels of performance set by Chord with its stunning control, hi-end audio performance and jewel like design features. The 'Prima' operates Chord's dual bus system, which allows you to tape from any source, while listening to any other. It also hosts Chord's new UHF designed Power Supply. The audio circuit is designed using fully balanced line internal architecture and offers six input gain adjustments independently for the five inputs and low impedance outputs.

### Product Specifications (Preliminary)

Unbalanced Inputs:	1 x pair of balanced XLR's
Balanced Inputs:	4 x pair of unbalanced RCA
Outputs:	1 x pair of balanced XLR's 1 x pair of tape output sockets
Nominal Gain:	6 levels of gain on all channels, (0.25, 0.5, 0.75, 1, 1.25 & 1.5)
Mains Power	50Vac through to 260Vac Auto line adjust
Dimensions (mm):	335 x 60 x 170 (W x H x D)
Weight:	8 Kg
