

EVOLUTION LINE

Gaia

New version of Fezz Gaia MM/MC phono stage. In standard Gaia is equipped with anti-vibration feet, adapted to the weight of the device. Backlight logo. Suitable for MM and MC cartridges. Build based on the highest class components such as the Burson V5i operational amplifier or Toroidy.pl audio transformer. Gaia MM/MC can be used with a standard amplifier based on transistors and also with tube amplifiers. It offers exceptional rich midrange. Moreover it has fast and dynamic bass extension. Wide sound stage definitely goes beyond the limits of preamps available on the market so far.

Specification:

Model: Gaia MM/MC HO

Type : Phono Stage

Cartridge type : MM/MC RIAA curve EQ

Power consumption : 10W

Operation amplifier type : Burson Audio Supreme V5i

AC Supply : Stabilized + toroidal Audio Grade transformer by Toroidy.pl

Gain MM: 53 dB , MC: 60 dB

THD distortion (20Hz-20kHz): <0.15% (MC section), < 0,008%

Crosstalk >95dB

Signal/noise ratio MM/MC: >92dB

Input impedance MM: 47k Ω , MC: 100 Ω

Dimensions : 212 x 320 x 95 mm

Weight: 5 kg

Colour schemes:
