Gratia

New version of Fezz Gratia MM/MC phono stage. In standard Gratia is equipped with anti-vibration feet, adapted to the weight of the device. Backlight logo. A phono stage is designed to work with MM, MC HO and MC cartridges. The amplification section is based on the high end operational amplifier - Burson Supreme Sound Opamp V5i. The heart of the extended power path is the Supreme Audio Toroidy.pl transformer. Undeniable advantage of Gratia is universality. Thanks to the wide settings varieties, it can be a perfect match with a low output signal level MC cartridges.

Model: Gratia MM/MC

Typ : preamp gramofonowy

Cartridge type: MM/MC HO/MC , RIAA curve EQ

Inputs / outputs: 2/1

Operation amplifier: Burson Audio Supreme V5i

AC Supply: Stabilized + toroidal Supreme Audio Grade transformer by Toroidy.pl

Subsonic filter: yes

Stereo/Mono mode switch: yes

Gain MM/MC LOW: 50dB / 60dB

THD distortion (20Hz-20kHz): <0.005%

Crosstalk MM/MC: >95dB / >96dB

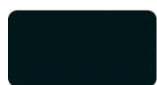

Signal/noise ratio MM/MC: >92dB / >90dB

Input impedance MM/MC: 47kΩ / 50-1kΩ

Power consumption 12W

Weight : 8 kg

Dimensions : 355x380x95mm
