Sagita line preamplifier

New version of Sagita line preamplifier. In standard equipped with anti-vibration feet, adapted to the weight of the device. Backlight logo. Sagita Fezz Audio is a top-class line preamplifier equipped with 8 RCA inputs, including one direct. Two pairs of RCA outputs creates a possibility to be used in a Hi-fi systems, based on up to four monophonic power amplifiers. It is a perfect match with tube-based and transistor sets. Sagita provides linear sound without unnecessary tone coloration. The Sagita pre-amp is based on the high-end Burson V6 Vivid opamps. An important part of the power section is the audio grade Toroidy.pl transformer.
