# LUNA

## VACUUM TUBE AMPLIFIER

The new Fezz Audio LUNA delivers the legendary warmth and musicality of EL34 tubes, combined with modern engineering for greater versatility and reliability. With selectable Ultralinear or Triode modes, modular expansion cards, HT and Sub Out connectivity, and a refined remote control, LUNA combines timeless tube charm with today's functionality. Stylish and well-built, it enhances both the look and sound of your setup. LUNA is a true expression of Fezz Audio's philosophy - where tradition meets innovation, and music comes alive.

Model: Luna

Type: vacuum tube stereo amplifier

Class: AB1, push-pull

Tubes: 4x EL34 + 3x 12AX7

Inputs: 3x RCA + 1x DIRECT

Options included: tube cage, sub-out, HT (pre-in), IR remote control

Equipment card slot extension: 1x

Suitable speaker impedance: 4  $\Omega$  / 8  $\Omega$

Nominal output power: 40 W (ultralinear) 20 W (triode)

Total harmonic distortion (1 kHz at full power): <0,05%

Signal bandwidth: 16 Hz – 115 kHz

Signal to noise ratio: -82 dB

Damping factor: >20

Input impedance: 50 k $\Omega$

Sensitivity: 0,7 V

Power consumption: 170 W (at idle); 250 W (at full power)

Net weight : 20 kg

Dimensions: 354x420x235 mm

Colour schemes:

Black Ice

Big Calm

Burning Red
