

EVOLUTION LINE

LUNA MINI

VACUUM TUBE AMPLIFIER

The Luna Mini is a refined single-ended, Class-A integrated tube amplifier, created for those who seek the purest expression of music. Powered by two EL34 output tubes and 12AX7 driver tubes, it delivers 10 watts per channel with remarkable musicality. The single-ended design of the Luna Mini ensures a naturally open and fluid presentation, with a rich and engaging midrange that brings vocals and instruments to life. The Luna Mini combines warmth and intimacy with excellent resolution and tonal balance, making every listening session a deeply emotional experience. Compact in size but uncompromising in performance, the Luna Mini embodies the essence of tube amplification in its most authentic form. Additionally, the amplifier is equipped with an extension slot, allowing you to easily enhance its functionality with modules such as DAC, Phono, or Bluetooth.

Specification:

Model: Luna Mini

Type: vacuum tube stereo integrated amplifier

Class: A

Tubes: 2x EL34 + 2x 12AX7

Inputs: 3x RCA + 1x sub out

Options included: sub-out, IR remote control, tube cage

Equipment card slot extension: 1x

Suitable speaker impedance: 4-8 Ω

Nominal output power: 10 W

Total harmonic distortion (1 kHz at full power): <2,5%

Signal bandwidth: 16 Hz – 130 kHz

Signal to noise ratio: -84 dB

Damping factor: >10

Input impedance: 50 k Ω

Sensitivity: 0,7 V

Power consumption: 100 W

Net weight : 15 kg

Dimensions: 285 x 417 (with spk terminals & knobs) x 220 mm (with tube cage)

Colour schemes:

Black Ice

Moonlight
