

## EVOLUTION LINE

### OVO

#### VACUUM TUBE HEADPHONE AMPLIFIER

Fezz Ovo is a premium headphone amplifier, developed to drive each and every headphone, even the most difficult one. Switchable impedance ranges allow to select the most suitable setting and create a perfect match. Careful design and very best components used, including supreme power and output transformers made by Toroidy lead to superior tonal quality and outstanding performance. Single ended output stage, working in pure A-class triode configuration ensures rich, mellow sound with every detail present. Ovo allows you to hear what you have never dreamed before.

Model: Ovo

Type: vacuum tube headphone amplifier

Amplifier architecture: class A single ended triode (SET)

Tube types: 1x 12AX7, 2x EL84

Signal inputs: 1x RCA, 1x XLR

Signal outputs: 1x RCA, 1x XLR

Headphone outputs: 1x XLR, 1x 6,3 mm Jack, 1x 4,4 mm Pentaconn

Recommended load impedance: 16 - 600  $\Omega$ , in 3 ranges (LOW, MID, HIGH)

Sensitivity: 850 mV

Bandwidth: 16 Hz – 120 kHz (-3 dB,  $Z = 32 \Omega$ )

Total harmonic distortion: <1% ( $P = 1000$  mW)

Output power: 1500 mW (THD = 2%)

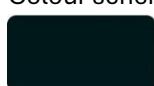

Bluetooth: optional plug-in module, remote

Power consumption: 40 W

Weight: 10,5 kg

Dimensions: 355 x 380 x100 mm

Colour schemes:

Black Ice

Big Calm

Burning Red

Republika

Evergreen

Moonlight

Sunlight
